

AAA COATINGS GLASSCOAT+ Technical Data Sheet

PROPERTIES / PRODUCT DESCRIPTION

AAA Coatings GLASSCOAT+ product has been developed to provide repellent properties to your glass & mirror surfaces against Calcium streaks, grease, and stains.

AAA Coatings GLASSCOAT+ gives your glass surfaces, hydrophobic & oleophobic properties reducing maintenance and cleaning regimes. Water and liquids simply bead and roll off, whilst stains are easier to remove, leaving no residue on the surface, making it the ideal solution for all mirror and glass surfaces.

AAA Coatings GLASSCOAT+ is exceptionally durable and highly effective. Incorporated into the AAA Coatings GLASSCOAT+ is Biomaster® Anti-microbial technology. The Biomaster® binds to the bacteria cell wall, disrupting growth. It interferes with enzyme production, stopping the cell producing energy. It also interrupts the cell's DNA preventing replication.

AAA Coatings Protect independent laboratory testing shows the anti-microbial properties of the coating to still be fully effective after 3 x lab washes which is the equivalent of 15 standard washes.

In typical tests to ISO 22196:2011 Biomaster® reduced levels of E. coli, MRSA, Listeria, Legionella, Salmonella, Campylobacter and Staphylococcus aureus by over 99%. The Biomaster® technology has also been shown to have virucidal properties in all applications.

- REDUCED MAINTENANCE
- REDUCED CLEANING-TIMES.
- ANTI-BACTERIAL.
- WATER BASED

PROTECTION FOR YOUR GLASS AND MIRROR SURFACES AGAINST:

- STAINING.
- BACTERIA.
- HANDPRINTS.
- CALCIUM RESIDUES.
- STREAKING

TECHNICAL DATA

UV: Stable

BINDER BASE: Polymer

Thickness cured: ~0.5um nominal

COMPATIBILITY: All Glass and
Mirrored surfaces

PART NUMBER:

APPEARANCE: White / milky
liquid

CARRIER: Water

APPLICATION: Wipe on/
Wipe off. Multiple Coats
every 6 months

MULTIPLE COATS:
Yes- every 3 months
for exterior surfaces.

CONTAINER SIZE: 250 ML.
